Docker Task –3

Task Description:

Create a custom docker image for nginx and deploy it using docker compose, where the volume bind mount should be at /var/opt/nginx location. Push the created custom docker image to your docker-hub.

Techstacks needs to be used :

- AWS EC2
- Docker
- Docker Compose

How do I submit my work?

- Push all your work files to GitHub (Code & O/P screenshot images must).
- Submit your URLs in the portal.

Terms and Conditions?
- You agree to not share this confidential document with anyone.
- You agree to open–source your code (it may even look good on your profile!). Do not mention our company's name anywhere in the code.
- We will never use your source code under any circumstances for any commercial purposes; this is just a basic assessment task.

NOTE: Any violation of Terms and conditions is strictly prohibited. You are bound to adhere to it.
